

The versatile kiosk terminal

For information, e-learning, visualisation and automation:
The robust and compact kiosk terminal skeye.vision touch is the solution.

Self-service information systems are gaining more and more significance within businesses. Customers access information in a quick and targeted manner themselves; employees carry out their own internal training. The skeye.vision touch has been specially designed for these applications.

Peripheral device selection for the skeye.vision touch is highly flexible: keyboards, laser scanners, RFID readers or document filing for e-learning applications. The flexible casing concept and high-performance hardware offer a multitude of deployment options.
